Professional Experience

Package App Developer | Accenture | June 2025 – Feb 2026

Engaged in intensive technical upskilling aligned with the company's future tech stack (.NET 9, Azure, and cloud-native development).

Assigned to a Fortune 500 client project, contributing to the modernization and maintenance of enterprise-grade banking systems.

- Contributed to enterprise banking system modernization for Fortune 500 client, working with Temenos (AFSVision) core banking platform
- Analyzed and resolved critical production issues in legacy banking modules.
- Refactored legacy code modules to align with modern architecture standards while maintaining business continuity
- Collaborated with offshore teams to debug and maintain high-availability banking interfaces

Web Developer (Freelance) | IChart | Oct 2022 – Dec 2023

Developing specialized web solutions in the hospice care industry.

- Designed and built secure healthcare web solutions for hospice care industry, handling sensitive patient data
- Implemented role-based access control and multi-layer authentication with policy-based login, ensuring HIPAA-style compliance
- Developed full-stack features using .NET MVC 6, Dapper ORM, and MySQL on Azure cloud infrastructure
- Built responsive frontend interfaces with JavaScript, Bootstrap, and Razor Views, improving user experience for healthcare staff
- Created comprehensive audit trail system for all data access and modifications
- Deployed and maintained applications on Azure.

Technical Skills

Programming Techniques:

- ORM using Dapper.
- Dependency Injection.
- Inversion of Control using Autofac.
- Docker
- RESTful API
- Microservices
- Repository Pattern
- Azure Integration
- Azure DevOps

Frontend:

- JavaScript
- Bootstrap
- Razor View
- HTML5
- CSS

Backend

- C#
- .NET MVC
- .NET API
- .NET CORE API
- .NET Core MVC
- SQL / NoSQL

Data Sources

- MongoDB
- Oracle
- MS SQL Server

Platform and Frameworks:

- Visual Studio 2026
- Visual Studio Code
- GitBash
- Postman
- Wso2 API Management
- Docker
- Swagger API
- Azure DevOps

Training:

Software Laboratories Inc. C# Intensive Training
May 2018 – July 2018

Led API security and infrastructure improvements for a leading bank.

- Led API security initiatives implementing SSL encryption and WSO2 API management gateway for banking services
- Developed reusable Enrollment API Gateway serving both mobile and online banking platforms, reducing development time for new integrations by [X]%
- Enhanced deposit APIs enabling seamless integration with Metrobank systems
- Optimized background job processing for automated ATM card requests.
- Implemented custom check digit algorithms (Meralco, Charter Ping An) for mobile banking billing modules
- Collaborated with cross-functional teams to ensure API availability and compliance with banking regulations

.NET Developer | Software Laboratories Inc. | May 2018 – Sept 2019

Built enterprise banking applications for PSBank and corporate clients.

- Developed enterprise banking applications for PSBank, supporting critical banking operations
- Built Unified Back Office system centralizing multiple banking functions into single interface
- Implemented session management and policy-based authentication, strengthening application security
- Created secure API File Manager with MIME validation and file processing pipeline
- Collaborated with banking stakeholders to gather requirements and deliver features on agile timelines

IT Support Level 1 | KMC Solutions Inc. | Jun 2014 – Sept 2016

Provided IT and network support for enterprise clients.

- Provided Tier 1 IT and network support for enterprise clients
- Managed Active Directory, DNS, WSUS, and Office 365 administration
- Handled firewall configuration and network troubleshooting

Education:

- **Bachelor of Science in Computer Science | October 2017**
Taguig City University
